Research Basics

Oskar Blakstad683.8K reads

The research process deals with the ways and strategies used by researchers to understand the world around us. This is a guide to basic elements of scientific research.

Research Basics

[1]

Research Methods ^[1]

Formulating questions, collecting data, testing hypotheses

[2]

Experimental Research ^[2]

Setting up experiments

[3]

Research Designs [3]

Different types of designs used in research

[4]

Statistics in Research [4]

A guide to statistics in research.

What is Research?

What is Research? [5]

Basics of the Scientific Method [6]

What is Empirical Research? [7]

What is the Scientific Method? [8]

Definition of Research [9]

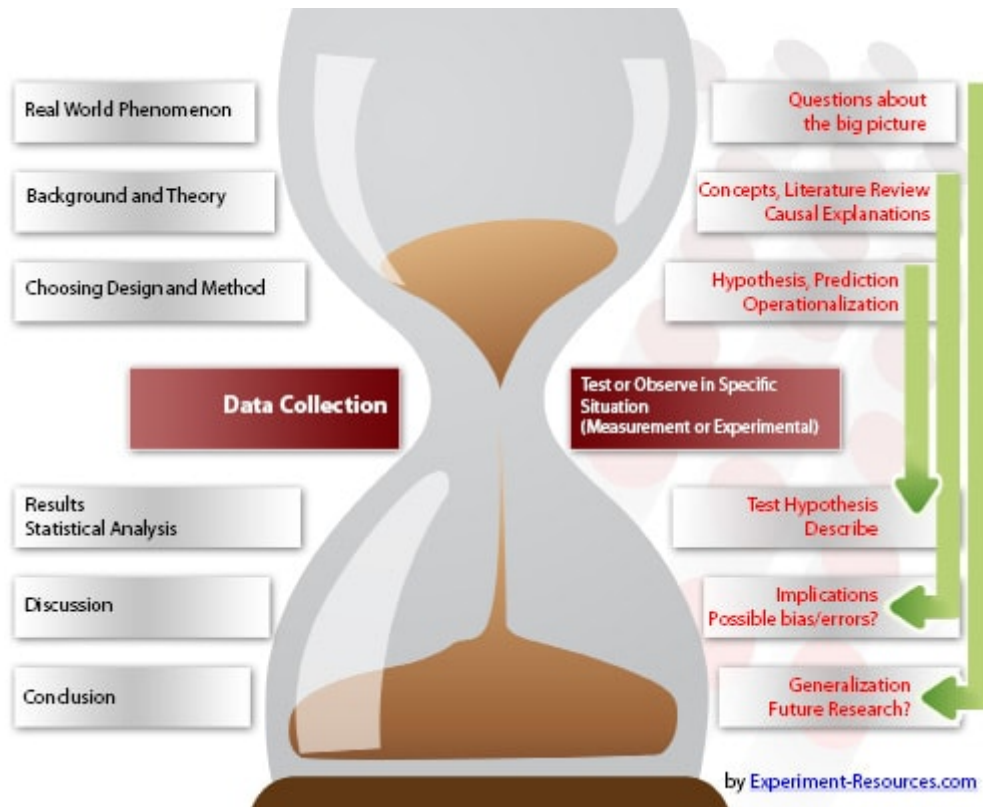

Definition of the Scientific Method [10]

Definition of Science [11]

Steps

Steps of the Scientific Method [12] - The scientific method has a similar structure to an hourglass - starting from general questions, narrowing down to focus on one specific aspect [13], then designing research where we can observe and analyze this aspect.

At last, the hourglass widens and the researcher concludes [14] and generalizes [15] the findings to the real world.

Aims of Research

The general aims of research ^[16] are:

- Observe ^[17] and Describe
- Predict ^[18]
- Determination of the Causes ^[19]
- Explain

Purpose of Research ^[20] - Why do we conduct research? Why is it necessary?

Elements of Research

Common scientific research elements ^[21] are:

Characterization - How to understand a phenomenon

- Decide what to observe ^[22] about a phenomenon
- How to define the research problem ^[13]
- How to measure ^[23] the phenomenon

Hypothesis ^[24] and Theory ^[25]

- The research questions ^[13] before performing research
- Almost always based on previous research

Prediction ^[18]

- What answers do we expect?
- Reasoning ^[26] and logic on why we expect these results

Observation ^[17] or Experimentation ^[2]

- Testing characterizations, hypothesis ^[27], theory and predictions
- Understanding a phenomenon better
- Drawing Conclusions ^[14]
